CPSC 304 Project Cover Page

Milestone #: 1
Date: 30th September, 2025
Group Number: 30

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Ketan Saraf	71049779	f4t4q	saraf.ketan1108@gmail.com
Samarth Kapila	77825172	t5c4f	samarthkapila673@gmail.com
Norinne Norinne	46986816	i7a2e	norinne.arora@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)
In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Answers

2) A. I am making an application for a role-playing video game and the domain is the video game industry.
B. Our database models the progression system and the current state of the video game for a user. It focuses on four main things:

- Users and their progress, stored in save files
- Achievements and progression rewards
- Game world and objectives with associated items
- Characters and roles in the world

This schema can support the backend of many modern role-playing games while syncing with live services such as Playstation accounts to support achievements and user associations.

3) The video game database will provide functionality to:

- Store save files with checkpoint data allowing users to continue from saved progress
- Store all locations and items in the game
- Track user achievements and completed objectives
